Screenshot 2: Initial Card Display

```
public class CardDisplay extends Application {
    private void drawCards() {
        // Build a list containing card numbers 1 through 52
        List<Integer> deck = new ArrayList<>();
        for (int i = 1; i <= DECK_SIZE; i++) {
            deck.add(i);
        }

        // Shuffle randomizes the order using the default random
        Collections.shuffle(deck);

        // Load the first four shuffled cards from the cards s
        for (int i = 0; i < CARDS_TO_DISPLAY; i++) {
            int cardNumber = deck.get(i);
            String imagePath = "cards/" + cardNumber + ".png";
            Image cardImage = new Image("file:" + imagePath);
            cardViews[i].setImage(cardImage);
        }
    }

    public static void main(String[] args) {
        launch(args);
    }
}
```
